## PROTECTAPEEL

PAINT • PROTECT • PEEL

## Boothstrip

Protectapeel Boothstrip is used to protect spray booth walls, floors and work surfaces against damage such as overspray and contamination. Protectapeel Boothstrip can be applied onto a number of surfaces such as; plastic, aluminium, stainless steel, glass and painted surfaces.

Protectapeel Boothstrip offers you a smart way to protect all your vulnerable surfaces, no matter what size or shape. Protectapeel Boothstrip is liquid applied, by airless spray or roller, you apply it directly to the surfaces that need protecting, no cutting to size, no off cuts, no wastage, just smart protection and all from a water based product.

Once dry, Protectapeel Boothstrip forms a skin tight bond with the surface, protecting it from spraybooth damage. Protectapeel Boothstrip can withstand temperatures of upto 80°C, has a reflective surface - creating better working conditions and can be overcoated several times.

When required, Protectapeel Boothstrip is easily removed by hand peeling. As you can see Protectapeel Boothstrip has protected the spraybooth from paint overspray - revealing clean and undamaged surfaces.
