PROTECTAPEEL

Floordefend

Heavy Duty Floor Protection System

Protectapeel's Floordefend System is a dual layer, heavy duty, temporary protection system for hard flooring. The two part system comprises of Protectapeel's water based, peelable coating and Floordefend's Top-Mat.

Protectapeel's Floordefend system is applied in 2 steps;

Step 1 – Apply a suitable Protectapeel liquid base-coat by either roller or airless spray.

Step 2 – Apply the Floordefend Top-Mat whilst the base coat is wet and press in.

Once dry the Floordefend system is designed to protect and defend floors from damage caused during construction, fit out and re-fit including domestic and commercial traffic internally and externally.

**Heavy Duty
Hard Floor
Protection for
up to 9
Months**

The 2-part Floordefend System is durable enough to withstand **forklifts**, **cherry pickers**, **scaffolding**, **heavy foot-traffic**, **tool boxes** and **equipment**.

Just before hand over, Floordefend can be peeled up in a large thick sheet, taking dust and dirt with it, revealing a clean and undamaged floor without leaving any residue behind.

**Floordefend
is compatible
with
Protectapeel
coatings**

Why use Floordefend?

- The Floordefend System replaces outdated and ineffective plastic and plyboard methods of protection.
- Floordefend Top-Mat can be used with all of the Protectapeel products.
- Floordefend can be used to protect floors and surfaces internally for up to 12 months and externally for up to 9 months.
- It's quick and simple to install and is easily removed by hand peeling.
- Floordefend will save you time and money through a reduction in floor repair and expensive cleaning costs.

Floordefend Offers Outstanding Protection

- Slip resistance
- Solvent resistance
- Grinding and welding spatter resistance
- Scratch resistance
- Impact resistance
- Water resistance
